What is the purpose of NodeStats.

The goal of NodeStats will be to provide specific and useful masternode coin information to the users of the system.

When many people start investing in Masternode (PoS) coins, they almost always only look at the ROI and the cost of the specific coin. NodeStats will give the users this information in an easy way, and will tell them how far the current coin has come in financial development so they can decide to invest with speculation/short term in mind, or if they need to read further on the project and decide if they want to do a long-term investment.

There are a lot of sites almost doing the same, like Masternodes.online and many more. I (the founder) found that these sites are heavy to navigate, and you never have the important information gathered in one place. It is my vision that NodeStats will give the users exactly what they need in one place, not being the next MNO site.

The way NodeStats is aiming for this is to let the user have a saying in almost everything on the site via its own community server. They will be introduced to a constant flow of votings via the voting system, where every vote will cost a small amount of NS (NodeStat coins) and the votings can be about new coin listings as well as new features and information on the coin specific pages or even features on the entire website.

The advantage of using NS.

NodeStats will be about just as much as a website, as it will be a community. Every contact will be with the community in an open manner, and you will always be able to make contact with the coin developer.

The main advantage of the coin will be, that you can use NS to have a saying in what is going on at NodeStats by using your coins in the voting system. So, if you like to participate and be heard, then you will have the chance for that with NodeStats.

The voting system.

The voting system will be done via the blockchain. We will present the different voting options along with an NS deposit address for each voting option on the website, and promote them on the social medias and in the communities. Then everyone can follow the voting by the explorer, and see that no one is cheating.

The community server.

We will run our own community server alongside with Discord, where we will announce upcoming stuff, votings and news. Our own community server will be released later in the process.

Presale.

There will of course be a presale.

If you want to buy NS in presale, these are the prices in BTC, which will be the preferable currency to buy your NS in.

1000 NS - 0,0022 BTC

2000 NS - 0,0044 BTC

4000 NS - 0,0088 BTC

8000 NS - 0,018 BTC

10000 NS +5% - 0,023 BTC

20000 NS +10% - 0,046 BTC

50000 NS +15% - 0,12 BTC

100000 NS +20% - 0,24 BTC

Roadmap.

2021 - Q2:

Whitepaper release

Blockchain-Start

Desktop wallet release

Public Presale

Masternode service listing (IhostMN & Crypos)

Releasing NodeStats website

Building the Discord community

2021 - Q3

Marketing Campaign

Contacting Coin teams for listing

Make suggestions for features and coins

Making our first Votes

Implementing the changes from the votes

2021 - Q4

Implementing new features on website

Implementing the community

NS Specification

Type: Proof-of-Stake

Name: NodeStats

Symbol: NS

Algorithm: Quark

Max coin supply: 21 million

Premine: 1 million

Block time: 60 seconds

Maturity: 101 blocks

P2P Port: 22440

RCP Port: 22441

Masternode Reward: 90%

Staking Reward: 10%

Collateral structure:

Start	End	Collateral	Reward
0	10000	10000	22,5
10001	30000	12000	25
30001	50000	14000	30
50001	70000	16000	35
70001	90000	18000	40
90001	110000	20000	45
110001	130000	22000	50
130001	150000	24000	55
150001	175000	26000	60
175001	200000	30000	65
200001	225000	35000	70
225001	250000	40000	75
250001	300000	45000	80
300001	400000	50000	40
400001	500000	60000	20
500001	750000	70000	10
750001	1000000	80000	5
1000001	<	100000	2,5

What is a Masternode.

A masternode is a server within a decentralized network.

Therefore, it should be emphasized that a master node can perform the following tasks that a node (nodes) cannot perform, such as:

• The processing of anonymous and confidential transactions

• Instant Transactions

• Monitor the network itself (example hypernodes)

• To have voting rights and to be able to exercise them

Masternodes are to bring more security and scalability to the network through additional functions. The high investment limit prevents monopolization and centralization, such as through pool mining.

Exclusion of liability and warranty of the user

The site www.nodestats.info may and should only be used for information purposes. The operators of presale | ICO projects (crypto currency and initial coin offering) listed on www.nodestats.info pay a fee for the listing. www.nodestats.info does not provide investment, financial or legal advice. This website cannot replace professional advice and independent verification of facts.

We are not responsible for warnings or documentation for listed projects.

The crypto-currency and ICO projects listed on www.nodestats must contain their own warnings regarding the risk of the offers they advertise. Your documentation may contain information about other crypto-currency and ICO projects not listed at www.nodestats.info. www.nodestats.info is not responsible for risk warnings, documentation, or the crypto currency and ICO projects listed on this site.

No investment advice or brokerage services

The site www.nodestats.info is not an investment advisor or investment intermediary. No content on the site is intended, or should be construed, as a recommendation to enter into any securities transaction or investment or as an endorsement, recommendation or rating of any project or investment. We do not provide personalized recommendations or opinions as to whether a project or investment approach is appropriate for the financial or other objectives and needs of any particular individual, company or other entity.

No tax advice or legal advice

The site www.nodestats.info does not provide tax or other accounting services or legal advice. We are not accountants or lawyers. No content on the site should, or should be considered as legal or tax advice. We recommend that you consult with licensed accountants and attorneys to obtain independent advice.

No liability

Neither www.nodestats.info nor any person or entity associated with www.nodestats.info, including but not limited to its agents, servants, employees, insurers, attorneys, successors and assigns, shall be liable, whether in contract, tort (including negligence) or otherwise, for any damages, costs or other losses you may suffer as a result of using or relying upon the content of www.nodestats.info.

User warranties

By using www.nodestats.info you give the following guarantees:

Full knowledge

You warrant that (a) you have read, understand, and agree without reservation to be bound by the terms and conditions set forth on www.nodestats.info; (b) you have read and understand the www. nodestats.info disclaimer. (c) accepts the warranties you make by using the site.

Personal research

You warrant that you understand that the content of www. nodestats.info is for informational purposes only. Therefore, it is extremely important that you research and analyze all information on www. nodestats.info on which you wish to rely independently. Consider your personal circumstances and objectives and seek independent financial advice from appropriate professionals before making any investment decision or taking any other action.

No illegal activities

You represent and warrant that to the best of your knowledge and belief and with due diligence you undertake not to commit any money laundering or other illegal activity in connection with your use of the www. nodestats.info site and that no proceeds of money laundering activities will be used to invest in pre-sale | ICOs published on the www. nodestats.info site. You also warrant that you comply and will comply with all applicable anti-money laundering regulations. Furthermore, you warrant that you will not, directly or indirectly, transfer any valuables to government officials, employees of a state-controlled company, political party or private (non-governmental) entities in connection with your use of www. nodestats.info . Persons or companies working on behalf of a government in order to obtain an improper benefit or advantage. You warrant that no money paid to you as compensation has been or will be used to pay bribes or kickbacks that violate any applicable law.

Risk awareness

You warrant that you understand that crypto-currency and pre-sale | ICO (Initial Coin Offering) projects are inherently high-risk and highly speculative. They are unregulated at an early stage of development and have experimental software and business models, no government protection of your investment, greater price fluctuations, the strong potential for inadequate documentation and a high risk of fraud.

You should only invest in or crypto-currency pre-sales |ICO projects if you have sound technical knowledge and are familiar with the specifics of the offer. Careful due diligence should be performed on projects, networks, tokens and teams behind a token sale or ICO. You must be aware that your and other investments may not add value.
